Summary for Thursday, September 9th:

Completed drilling approximately 21 cells: B5-B8, C5-C8, D2-D8, E3-E7, and F3

Shipped 3 coolers to the laboratory. See attached COC's for that count.

We collected background samples from two locations yesterday in areas previously sampled by the ADEQ. We're scheduled to collect background samples from an additional two locations today.

We've got approximately 5 cells remaining to sample today. Once samples are submitted to the laboratory, we'll demobilize from the site. Onsite activities should be completed by 11:30.
